EXEMPT STATUS:

The Project is exempt from the provisions of CEQA because it falls under one or more of the following **Categorical Exemptions:**

Class 1, 14 CCR §15301 Existing Facilities.

The Class 1 exemption under CEQA Guidelines Section 15301 allows for the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of existing or former use. The Project consists of the addition of a security fence to ensure safety and security of the existing facility. This is a minor alteration to the facility with no expansion to the facility or alteration to its use.

Class 3, 14 CCR §15303 New Construction or Conversion of Small Structures.

The Class 3 exemption under CEQA Guidelines Section 15303 allows for the construction and location of limited numbers of new, small facilities or structures; installation of small new equipment and facilities in small structures; and the conversion of existing small structures from one use to another where only minor modifications are made in the exterior of the structure. This includes accessory (appurtenant) structures such as fences. The project consists of the installation of a security fence around the existing facility with a gate for vehicle and personnel access.

Exceptions to Use of Categorical Exemptions (14 CCR §15300.2)

This analysis also considered whether the Project is subject to any of the exceptions listed in CEQA Guidelines Section 15300.2 on the use of categorical exemptions. This section prohibits the use of categorical exemptions when the Project falls under one or more of the categories listed below:

- §15300.2(a): For certain classes of projects (Classes 3, 4, 5, 6 and 11), due to the location of the Project, may impact an environmental resource or hazardous or critical concern;
- §15300.2(b): When the cumulative impact of successive projects of the same type in the same place, over time, is significant;
- §15300.2(c): Where there is a reasonable possibility that the Project will have a significant effect on the environment due to unusual circumstances;
- §15300.2(d): Where the Project may result in damage to scenic resources, including but not limited to, trees, historic buildings, rock outcroppings, or similar resources, within a highway officially designated as a state scenic highway;
- §15300.2(e): Where the Project is located on a state designated hazardous waste site; and
- §15300.2(f): Where the Project may cause a substantial adverse change in the significance of a historical resource.

These exceptions above do not apply to the Project. The findings with respect to each exception is provided below:

- §15300.2(a): The Project is not located in an area of sensitive or hazardous or critical concern.
- §15300.2(b): There is no evidence of a potential significant cumulative impact because successive projects of the same type in the same place have not been approved and are not currently proposed.
- §15300.2(c): The Project site is located next to a residential area and Schaefer Ranch Park. Thus, the Project will not result in any significant effects on the environment due to unusual circumstances.
- §15300.2(d): This exception does not apply because the Project site is not located adjacent to a designated scenic highway.
- §15300.2(e): This exception does not apply because the Project is not located on a state-designated hazardous waste site.

- §15300.2(f): This exception does not apply because the Project does not directly affect any historical resource, nor is the Project site located adjacent to a historical resource.
